How Business is Committed to Selling/Producing Native Plants

We grow a full line of native herbaceous plants, shrubs and trees for restoration, reforestation, wetlands and landscaping. We are 99% plus native and can deliver anywhere.

We are a wholesale nursery specializing in native herbaceous wetland and aquatic perennials. We offer over 100 varieties available in plugs for easy shipping.

We specialize in container established native trees and shrubs for conservation projects. Inventory includes over 350,000 native trees and shrubs, 82 species. We are committed to providing professional service producing plants that successfully transplant into every type of project.

We are growing native plants to show that natives use less water, require less fertilizer, and less diseases. We are growing natives for the wholesale industry.

Coldwater Pond Nursery is a wholesale propagation nursery that offers custom propagation and growing of native and non-native plants. Propagation services include cuttings, seedlings, divisions and other forms of woody plant propagation.

Our organization holds a native plant sale at our nursery on the first Saturday of every November. The plants we sell are grown from seed collected only from wild populations on the Delmarva Peninsula.

Holly Hill Farms is committed to growing native plants (approx, 30% of our inventory) to serve an ever increasing industry that is aware of conserving and re-establishing our natural resources. More and more landscape designs are specifying native plants over conventional orientals to create a natural and pleasing environment. We are committed to fulfilling that need.

We try to substitute undesired plants with natives.

We are committed to growing and selling plants that are hardy and well adapted to Delmarva. This material includes both Native Species and those species that have proven reliable over many years.

Mid Atlantic Plant Co. is a horticultural broker representing propagators of native plants.

We **only** grow plants that are native in the temperate eastern US. We often collect our own seed and grow it-recording provenance. We like the diversity of seed grown plants. We grow what belongs, and have been promoting native plants for twenty nine years.

Twenty years growing and promoting Eastern US native plants. Developed "Landscape plug" for easy installation and establishment of native plants. We plugs of perennials, grasses, ferns, and shrubs, also plants for remediation, rain gardens, bio swales, wetlands, highways, nature centers, etc.
Wholesale growers on native woody trees and shrubs for the Northeast and Mid-Atlantic regions.
We have been strictly a native plant nursery for twenty six years. Ninety-five percent of the material that we grow is grown from seed that we collect locally near our three locations in NJ, NY and VA.
Signature Horticultural Services is a native plant nursery specializing in herbaceous perennial plants indigenous to the Mid-Atlantic region. We grow some ninety different species with an emphasis on wetland plants suitable for storm water management ponds and restorations.
Sylva was established in 1988 to propagate, grow and sell native flora of the Northeast, Mid-Atlantic and Southeast states, using propagates of local provenance, for use in ecological restoration, landscape enhancement and wildlife habitat.
Leading producer of commercially viable native perennials, ornamental grasses, and hardy ferns. Have a 132-pg. color catalog with native identification, separate catalog, "What's Native" and dedicate website www.whatsnative.com
Transplant Nursery is committed to growing native plants as part of our production. Native azaleas, <i>Clethera</i> , <i>Ites</i> , <i>Fothergilla</i> , <i>Callicerpa</i> , native rhododendron, <i>Kalmia</i> , and <i>Calycanthus</i> are part of our product mix.
